RAIN DATE: WILD CARD WEEKEND:
NOV 18 & 19

BIG BLOCK MODIFIEDS

The mighty
modifieds
with 467 cubic
inch motors
serve as Bridgeport Speedway's
headline class. If you love the Big
Blocks Bridgeport Speedway is the
only track in New Jersey to feature
them on a weekly basis.

CRATE/SPORTSMAN

Drivers in
this highly
competitive
division can
use 358 cubic engine with a 2
barrel carb or a 350 - 400 block
crate engine(Ford or GM) to
motor around the clay oval. This
class fits the pocketbook of all
weekly racers and many advance
into the Big Block Modified
division.

**OUTLAW
STOCKS**

A full bodied
stock car
that represents the late models
of yesterday. Most of these
chassis are from the 80's model
cars such as Monte Carlos and
Camaros that dominated the race
tracks of the 1970's. Don't be
fooled, these guys can fly, and
some of the tracks most expe-
rienced and seasoned drivers
buckle in to do battle each week
in the Outlaw Stock division.

SPRINTS

Sprint cars
spend most
of their time
scrambling
for traction, broad sliding around
the corners, wheelstanding on
the straights, and throwing clay
into the stands; all while reaching
speeds up to 140 mph. 900
horsepower is commonplace for
these machines, which typically
have a 410, 360, or 305 cubic
inch engines and are fueled by
methanol. With no starter, sprint
cars must be push started.
